

**The DENSO SERVICE KIT
contains the following parts:**

Spark plug (for petrol engine)

Known as the 'heart of the engine', spark plugs play a key role in the ignition and performance of the entire engine. The well-timed combustion of the fuel-air mixture of gasoline and oxygen is what generates power in gasoline engines. The precise timing of the spark created by the spark plug ignites the fuel, triggering combustion.

To create this spark, a high voltage is passed between the centre electrode and ground electrode of the spark plug. This voltage breaks down the natural insulation between these electrodes and an electrical spark is generated. Although this strong spark only lasts for about 1/1,000 of a second, it has to be precisely and reliably timed to trigger the combustion of the fuel-air mixture.

Air Filter

Air filter works to remove impurities contained in the air such as dust and foreign particles to supply clean air to the engine.

Without the air filter, polluted air may enter the car's engine when power is generated through the repeated cycle of intake, compression, combustion and exhaust. This will lead to insufficient combustion and power, and also shorten engine life, due to damages by foreign particles.

Diesel Fuel Filter (for diesel engine)

Diesel fuel filter, or commonly known as DFF, filters dust and water from diesel fuel.

Diesel components like pump or injector is getting more precise especially for Common Rail System. These components are designed and manufactured in a couple of micrometers of tolerance to accurately work under extreme high pressure.

Oil Filter

The oil filter in your engine system filters the impurities in there, to keep the engine oil clean.

The engine oil is an important component to keep your automobile moving.

Cabin Air Filter

Just like the air conditioner in your house, the air-conditioner in your car has a special filter. Car air conditioner filters cleanse the air both from outside and from within.

Please note these part nos are applicable to many more applications and can be found on the DENSO website

Authorized Dealer's Stamp:

About COOL GEAR

COOL GEAR, another brand from DENSO, is developed especially for aftermarket users. We understand that our customers need high quality products at affordable prices, thus COOL GEAR Filters are developed to aftermarket specifications.

Benefits to Car Owners

Quality assurance is guaranteed for COOL GEAR range of products. You can be assured that you are providing the best you can, for your car.

COOL GEAR Packaging for filters aimed to attract consumers with its colorful packaging, that is why packaging design is different from the packaging of COOL GEAR Car A/C service parts.

However, COOL GEAR distinctive blue color identity is still maintained, despite changing to a colorful packaging. In addition, the commonly seen COOL GEAR Arc is also visible in the new packaging.

Do insist on genuine COOL GEAR Filters, recognizable with the above packaging. Imitation or fake products will harm your beloved car.

DENSO Corporation, headquartered in Kariya, Aichi prefecture, Japan, is a leading global automotive supplier of advanced technology, systems and components in the areas of thermal, powertrain control, electronics and information and safety. Its customers include all the world's major carmakers. Worldwide, the company has more than 200 subsidiaries and affiliates in 38 countries and regions (including Japan) and employs more than 130,000 people.
