Important Legal Notice: Trademarks and Affiliation

All product references, part numbers, names, and cross-references (including those of other manufacturers) used in this catalogue are provided strictly for identification and compatibility purposes only, pursuant to Section 34(2)(c) of the South African Trade Marks Act no. 194 of 1993. DENSO Sales South Africa is an independent entity. References to the trademarks, trade names, or part numbers of other manufacturers are used solely to assist the user in identifying compatible parts and do not imply any affiliation, sponsorship, endorsement, or commercial connection between DENSO Sales South Africa and the respective trademark proprietors. All third-party trademarks, brand names, and part numbers remain the exclusive property of their respective owners.

Section 1

Spark Plugs

Spark Plugs

Introduction

The DENSO Difference

DENSO has been setting the standard for spark plug technology since 1959. We develop all of our ranges in-house, and manufacture them in our own QS 9000 and ISO 9000 certified factories worldwide – with 'zero defects' as standard. We also provide this outstanding OE quality to the Aftermarket. With a range including Nickel, Platinum, Twin Tip and Iridium, DENSO Spark Plugs represent a complete portfolio of continually updated references. Guaranteeing optimum engine performance, choose DENSO Spark Plugs for every automotive, motorcycle, marine and small engine application.

Range

Twin Tip (TT)

Nickel TT

- > Nickel alloy centre and a 'twin' protruding ground electrode
- > Low carbon dioxide emissions
- > Improved fuel efficiency
- > Smooth engine running even under extreme conditions
- > Best value for money performance spark plug

Iridium TT

- > Two ultra-fine, highly durable centre and ground electrodes
- > Improved performance of up to 20% compared with traditional Nickel plugs
- > Life span of 120,000 Km
- > Premium OEM technology now available at a lower price for a wider range of vehicles
- > Fuel savings

Information in this catalogue is valid for the date of issue.

The recommendations in this catalogue are based on the latest information from manufacturers for operating under standard conditions. We do not accept legal claims arising out of the contents of this list.

Cross reference information should be used for guidance only. Design and material differences between manufacturers may vary in the Heat Range. See the recommendations section for specific engine applications.

Where manufacturers' names and/or numbers are stated, these are given for reference purposes only and do not indicate the source of manufacture or any connection in the course of trade with the manufacturers named. In order to find the right spark plug please refer to the original part number (OEM) on the part and find the corresponding DENSO part number in the cross reference table.

DENSO spark plugs are developed and manufactured for the use in automotive, motorcycle, marine, horticultural, agricultural, commercial, industrial and stationary engines. DENSO spark plugs CANNOT be used in aircraft, helicopter or other aviation engines.

Direct Fit

Nickel

- > Copper glass seal helps heat dissipation
- > Standard U-groove
- > Deeply inserted copper core
- > Heat resistant nickel plating
- > Multi-ground electrode plugs available

Double Platinum (Longlife)

- > Improved, more reliable start
- > More complete combustion (lower emissions)
- > Improved ability to overcome tuning imperfections
- > Superior throttle response and acceleration
- > Race proven technology

Iridium Power

- > Superb ignitability
- > Low required voltage
- > Better acceleration response and operational stability
- > Lower fuel consumption

Iridium Long-life, Iridium Tough

- > Superb ignitability
- > Low required voltage
- > Better acceleration response and operational stability
- > Lower fuel consumption
- > Longer lifetime

Super Ignition Plug (SIP)

- > Two ultra-fine, highly durable centre and ground electrodes
- > Latest Spark Plug technology
- > OE fitted in Honda, Hyundai, Kia, Lexus, Nissan, Mitsubishi, Mazda, Subaru, Toyota & Volvo
- > Top performance
- > Long lifetime

Racing

Iridium Racing

- > F1 technology
- > Ultimate acceleration
- > High reliability
- > Boosted performance

DENSO Patents

Plug electrodes conventionally have used nickel and platinum. These were not pure metals, but alloys containing other metals. Depending on the composition of the alloy, the matrix material's properties can be optimised. Using the same approach, iridium is alloyed with rhodium. The rhodium layer covers the iridium, improving the properties of the iridium. This iridium/rhodium technology was recognized by the Patent Offices of Japan and the UK, and in January 1999, a patent was granted in each respective country. (Patent Number - Japan: 2877035, UK: 2302367). Because DENSO had this patented technology, it enabled DENSO to reduce the diameter of the iridium electrode down to 0.4mm. DENSO is the original pioneer of this technology in today's market.

The most important aspects for plug performance are ignitability and spark intensity. The goal of spark plug manufacturers worldwide is to make the electrode as fine as possible and DENSO has taken the lead; succeeding the commercialising the 0.4mm diameter center electrode plug for the Aftermarket also.

DENSO's ground-breaking, Super Ignition (SIP) Spark Plug is the next generation Iridium/Platinum technology that's making waves with vehicle manufacturers around the world. Featuring not one, but two ultra-fine, highly durable centre and ground electrodes, they produce exceptional spark and performance – even in the demanding environment of lean-burn petrol engines.

The story does not end there - these patented electrode configurations have now been transferred to the Aftermarket Twin Tip (TT) range of DENSO spark plugs to allow an affordable, consolidated and fully interchangeable option for our customers in South Africa. And so, the next chapter begins ...

Range	TT Range		Direct Fit						Racing

¹ Spark plug types without a 'U' in the type name do not have a U-groove

² Not applicable to IU24A, IU27A, IU31A, IUF27A and IUF31A

³ Spark plug types with a 'Z' in the type name have a tapered cut ground electrode

⁴ Except for surface gap types

⁵ OEM Types, only for specific vehicles

⁶ Ø 0.7 mm Platinum needle available

CAUTION! (Prohibited usage of Spark Plugs)

- > Never use DENSO Spark Plugs in the engines for any aircraft, including airplanes, helicopters, gliders and drones. DENSO Spark Plugs are not designed and manufactured for any aircraft: use may result in a plane crash or other accidents due to engine malfunction.
- > Never use DENSO Spark Plugs listed in our catalogue in the engines for generators and gas heat pump air conditioning systems. These spark plugs are not designed and manufactured for such use. Such use may result in accidents, including power generation stop or heat generation stop. A separate catalogue for DENSO Cogeneration Spark Plugs specifically designed for generators (gas engines) is available. Please contact your DENSO representative for more information.
- > Never use DENSO Spark Plugs for gas burner ignition. DENSO Spark Plugs that we sell are not designed and manufactured for such use. Such use may result in ignition failure or equipment damage due to overheating.

Installation

Recommended Torque and Tightening Angle for DENSO plugs.

1. Use the correct wrench for the hex on the plug, and be careful not to damage the insulator.
2. When changing, make sure that the oil, etc. on the outside of the plug does not enter the engine interior.
3. When putting the plugs in, clean the engine side of the flange and put in the plugs after making sure the gasket is in the flange.
4. Make sure the plugs are vertical and tighten them by hand until they cannot be tightened any further (A+B).
5. Then use a torque wrench to tighten to the accurate torque value as shown in the chart below. When no torque wrench is available, use a spark plug wrench to tighten with the recommended turns. For further information on the absolute torque value, please visit our e-catalogue.

RECOMMENDED INSTALLATION TORQUE SPECIFICATION					
Thread size			Recommended Torque	Recommended Turns	
				New plug	Used plug
Gasket	M8	Y type	8-10 Nm	± 1 turn	± 1/12 turn
	M10	U, N type	10-15 Nm	± 2/3 turn	± 1/12 turn
	M10	Stainless steel gasket	10-15 Nm	± 3/4 turn	± 1/12 turn
	M12	SXU, X, XE, XU, ZXE, ZXU type	15-20 Nm	± 1/3 turn	± 1/12 turn
	M14	FK, J, K, KJ, P, PK, PKJ, PQ, Q, QJ, QL, S, SF, SK, SKJ, SV, SVK, VK, VKJ, W, ZT type	20-25 Nm	± 1/2 turn	± 1/12 turn
	M14	Stainless steel gasket	20-25 Nm	± 2/3 turn	± 1/12 turn
	M18	L, M, MA, MW type	30-40 Nm	± 1/4 turn	± 1/12 turn
Taper seat	M14 PT, PTJ, T type		20-30 Nm	± 1/16 turn	± 1/16 turn
	M18	MA type	30-40 Nm	± 1/4 turn	± 1/12 turn

If a thread lubricant such as grease is coated on the thread, tightening to the recommended torque is tightening too much; this has been linked to seal leakage. Do not use a thread lubricant.

Tightening more than the tightening angles and torques shown in the above table could result in damage to the engine and furthermore could result in the plug coming off at the thread.

Characteristics

FOR YOUR CUSTOMERS

- CO2 & HC Emissions REDUCED
- Fuel Economy & Efficiency INCREASED
- Performance & Reliability ENHANCED
- Affordability IMPROVED

FOR YOU

- Inventory Costs & Outlay REDUCED
- Stock Turn & Coverage INCREASED
- Customer Satisfaction ENHANCED
- Affordability IMPROVED

Specific to the Aftermarket, DENSO's Nickel TT [Twin Tip] range is the first-and-only patented fine-wired Spark Plug with Nickel construction featuring slim 1.5mm diameter "twin" ground and center electrodes. This means better ignitability - closer to that of Iridium plug performance - for the price of a Standard Plug. Covering 70%+ South Africa car parc with just 16 part numbers, each supplied as 4-pack, Nickel TT offers the best bang for your buck.

Nine out of every ten cars feature original DENSO parts. If major car manufacturers place their trust in DENSO, why shouldn't you?

Recommended for anyone who wants a better Nickel spark plug

- 1 **Boosting flying sparks and ignitability**
Thin center electrode (1.5mm)
Double Needle structure (a first with nickel)
Utilizes nickel alloy featuring new materials
- 2 **Model consolidation : Model 290 → Model 16**

High ignitability nickel plug impact of thin diameter on both sides of electrode

A new nickel alloy achieves thin diameter on both sides of the electrode, improving combustion by boosting flame development

Reasons why the Ni-TT plug can cover for other Nickel plugs

The Ni-TT plug can cover for other standard plugs thanks to its better ignitability (flame kernel spreads easily).

Improves speed and output

1.1% improvement in torque boosts horsepower by 1.1^{*1}

Improving engine torque means greater dynamism! Facilitates smooth driving even when subjected to a load--such as people or baggage--on top.

Standard plug

Vehicle: 1.5L, four-cylinder Rotation frequency: 3,500rpm (70km/h)

^{*1}Horsepower calculation equation: horsepower=torque X rotation frequency X 0.001396

^{*}All data is provided by DENSO. All references to standard plugs refer to DENSO products.

Improved fuel efficiency

Improves fuel efficiency by 1.2% ! The more you drive, the more economical it is!

Fuel efficiency is boosted by reliable ignitability. Fuel consumption is lowered, and the vehicle can run longer on the same amount of fuel.

Vehicle: 1.5L, 4-cylinder Driving conditions: 10-15 mode

Standard plug

^{*} All data indicated is provided by DENSO. All references to standard plugs refer to DENSO products

Travel distance

Conditions Fuel efficiency is improved by 1.2% by switching to the TT (10,000 km driving/year, fuel efficiency of 16.9 km/ℓ)

【 Conventional plug 】 10,000km÷16.9km= Approximately **591.7** ℓ

【 TT 】 10,000km÷17.1km= Approximately **584.7** ℓ

7-liter difference over 10,000 km, translating to an additional 120 km of travel distance

PLATINUM TT™

Better Ignitability and Fuel Consumption with Platinum and TT Technology.

- 1 DENSO Unique "Twin-Tip" Structure
- 2 1.1mm platinum center electrode
- 3 360 Laser welding

High Ignitability Platinum Plug

DENSO's revolutionary Twin-Tip design is a combination of durable precious metals-Platinum and Titanium. The center electrode is created using durable platinum alloy that allows for the reduction of the tip size to 1.1mm in diameter, while maintaining the life of the plug. The Titanium-enhanced alloy on the ground electrode also increases durability, which is critical to minimize tip erosion and achieve the new Twin-Tip design.

Better Ignitability

(A method)
Engine :1.8L 4cyl(1ZZ-FE)
engine speed:700rpm
Judgement of L.M.L :COV of combustion pressure exceed 25%

L.M.L :Lean misfire Limit
COV :coefficient of variation

The Ignitability of TT-Pt is better to Conventional plugs. (1.0UP)

Better Fuel Consumption

Platinum TT is superior to Conventional plugs by 1.5%

Better ignitability of the DENSO Platinum TT means more efficient combustion, which yields better engine performance in terms of power and fuel economy. Better mileage, more power, and faster starts, all while reducing carbon emissions are what places the platinum TT heads above the competition.

ϕ 0.4mm DOUBLE NEEDLE
IRIDIUM TT

**0.4mm Iridium,
 only at DENSO!**

0.4mm* The world's finest
 diameter (as of March 2021)

with an iridium center electrode
 *for appreciable models only

*The Finest TT plug
 with improved Acceleration
 Economical
 and long lasting!*

**ϕ 0.4 mm iridium alloy & ϕ 0.7 mm platinum needle alloy
 achieve high performance & high durability**

DENSO has started to sell IRIDIUM TT spark plugs having a ϕ 0.4 mm iridium alloy center electrode and a ϕ 0.7 mm needle-type platinum alloy ground electrode.

The quenching effect has been decreased by forming the electrode into a double needle shape. As a result, the flame kernel rapidly develops and the engine's power is drawn out to its maximum potential.

**Built-in,
 Highly Reliable Resistor**

All specification types include an embedded, highly reliable, monolithic resistor to eliminate electromagnetic noise interference from all kinds of electronic devices.

360° Laser Welding

The iridium tip is mounted with an "All-around Laser Welding" method that insures high reliability and durability even under the most severe driving conditions.

① ϕ 0.7 mm Needle-Shaped Platinum Ground Electrode

In order to maximally prevent quenching effect, the ground electrode needs to be made as small as possible. Traditional ground electrodes could not be made too small without reducing grounding strength or increasing electrode wear. However, we've managed to attach a fine 0.7mm-diameter platinum electrode using a 360° laser welding technique.

② ϕ 0.4 mm Ultra-fine Iridium Center Electrode

Using DENSO's exclusive iridium alloy having a very high melting point, the tip of the center electrode can be shaped very thin and fine, reducing spark voltage requirements and greatly improving ignitability.

Flame Growth

The photograph shows flame reflected by the variation in density. Fig. 1 shows the results of studying the influence of electrode shape on flame growth, using the Iridium Spark Plug and IRIIDIUM TT.

The photographs indicate that, in the case of the Iridium Spark Plug, the size reduction of the gap (from 1.1 mm to 0.6 mm) interfered with flame growth, while in the case of IRIIDIUM TT, flame growth was ample and greater than that of the Iridium Spark Plug in spite of the narrowed spark gap (0.6 mm). These observations show that, as the results of the ignition/firing simulation indicated, a fine ground electrode can reduce required voltage because it enables the spark gap to be narrower, while realizing higher ignitability than the Iridium Spark Plug.

Fig.1 Electrode Shape's Effect to Flame Growth

Higher Ignitability

Fig. 3 shows the results of evaluating how the miniaturized-portion protrusion direction may influence the ignitability of an engine. The evaluation checked idle speed at equal throttle opening with the ISC (idle speed control) turned off. A higher idle speed represents higher ignitability. This figure shows the results of evaluating IRIIDIUM TT. This figure shows that IRIIDIUM TT are better to the Iridium Spark Plugs in ignitability.

Advantages of Fine Ground Electrodes

To lower the required voltage and improve firing performance. The most advanced technology in the world has been employed to enable use of electrode, at 0.4 mm in diameter, in the IRIIDIUM TT.

The smaller the electrode the more concentrated the electric potential at the tip of the electrode and the stronger the electric field that affects required voltage and the lower the required voltage. As a result, combustion is good for all types of driving, the engine starts easily, and acceleration improves.

The above shows the strength of electrical field in case certain voltage changes on Iridium plug and IRIIDIUM TT.

The more electrical field strength is getting high, the more it becomes easy to fire with low voltage.

*1 FEM(Finite Element Method analysis): General method to measure electrical field strength.

Fig.2 Electric Field Analysis (FEM)

Better fuel efficiency

Fig. 4 shows the results of the examination of combustion variation and fuel consumption, using a 1,800-cc, four-cylinder engine. The evaluation was conducted by turning on the ISC and setting the average engine speed to 800 rpm (idling). The previously specified Type-1 of the IRIIDIUM TT was used in this examination. Pmi COV (coefficient of variation) in the diagram shows fluctuation in IMEP (indicated mean effective pressure). As this figure shows, IRIIDIUM TT can reduce the Pmi COV approximately 3.1% and accordingly reduce fuel consumption by 2.4%, compared with the Iridium Spark Plug. These advantages are achieved because the miniaturization of the ground electrode enables better ignitability, improving combustion efficiency. Because the IRIIDIUM TT is low in combustion variation and enables a reduction in idling speed, further improvement can be expected in fuel efficiency.

Comparison Between Genuine DENSO and Fake Spark Plugs

Appearance

Compare a potential counterfeit and a genuine DENSO Spark Plug side by side.

Insulator

Counterfeit spark plugs have an irregular insulator shape. The shape should be uniform.

Ground electrode

The width of the ground electrode is usually inconsistent on counterfeit products.

Material

A scratch test can reveal the cheap materials used in counterfeit products.

Ground electrode chip

Counterfeit spark plugs are prone to have cheaper or fake material coatings.

Center electrode

Look out for poor quality welding.

Branding

Counterfeit spark plugs lack precision when embossing the DENSO logo and often display spelling mistakes.

Problems Caused by Fake Spark Plugs

Problem 1

Fuel economy is diminished.

Inconsistent sparking causes incomplete combustion. Unburned fuel forms a black sooty deposit on the spark plug, eventually leading to poor fuel economy and poor start up of the engine.

Problem 2

Engine power drops on uphill roads and highways.

Poor heat dissipation due to the lack of a copper-core center electrode causes pre-ignition. As a result, engine power drops under highway driving or uphill driving conditions.

Problem 3

The plug melts down.

Continued usage of an overheated plug will damage the electrodes.

Why Power Drops and Melting Occurs

DENSO

DENSO plug contains copper core

Quick heat dissipation.

Copper is an excellent heat conductor. High temperature heat is quickly dissipated away from the center-electrode to prevent melt down.

Fake

Fake plug is iron only

Slow heat dissipation.

Absence of a copper-core center electrode results in poor heat dissipation capability. Prolonged use causes power loss due to excessive heat buildup. This results in melt down of the ground electrode, eventually leading to serious engine damage.

Finally ...

Service & Filter Kits

Denso

Service Kits

Quality You Can Trust

DENSO Sales South Africa introduces the DENSO Service Kit – a complete, convenient solution designed to keep your vehicle in excellent condition. Each kit combines essential DENSO components that deliver performance, reliability, and value for money.

The DENSO Service Kit simplifies vehicle maintenance by offering all key service parts in one package. Each part number is linked directly to the vehicle application, ensuring easy fitment and peace of mind.

What's Inside the DENSO Service Kit

Spark Plugs (for Petrol Engines)

Spark plugs are the heart of the engine, providing the spark that ignites the fuel-air mixture for efficient combustion and smooth performance.

Air Filter

Removes dust and impurities from the air, ensuring clean airflow to the engine for efficient combustion and longer engine life.

Cabin Air Filter

Filters out dust, pollen, and pollutants to maintain clean, fresh air inside the vehicle.

Diesel Fuel Filter (for Diesel Engines)

Removes water and microscopic impurities from diesel fuel to protect injectors and pumps in high-pressure systems.

Oil Filter

Keeps engine oil clean by trapping contaminants, helping the engine run smoothly and last longer.

Why Choose DENSO Service Kit

- **Quality and Reliability** – Trusted performance from a global leader in automotive components.
- **Easy Fitment:** Kit part numbers correspond directly with vehicle applications for fast, accurate installation.
- **Time and Cost Efficiency:** A single kit covers essential service components, reducing downtime and complexity.
- **Trusted Reliability:** Designed and tested by DENSO — one of the world's leading automotive component manufacturers.

Keep your vehicle performing like new with DENSO Service Kits
— **where genuine quality, convenience, and reliability come together.**

Denso

Filter Kits

Smart, Simple, and Reliable

DENSO Sales South Africa presents the DENSO Filter Kit – the perfect choice for customers who prefer to perform a filter-only service. Designed for quality, convenience, and long-term reliability, each kit contains all the essential filters needed to keep your vehicle performing at its best.

Each DENSO Filter Kit is carefully matched to specific vehicle applications, ensuring accurate fitment and an easy, one-time installation.

What's Inside the DENSO Filter Kit

Air Filter

Removes dust and impurities from the air, ensuring clean airflow to the engine for efficient combustion and longer engine life.

Cabin Air Filter

Filters out dust, pollen, and pollutants to maintain clean, fresh air inside the vehicle.

Oil Filter

Keeps engine oil clean by trapping contaminants, helping the engine run smoothly and last longer.

Why Choose DENSO Filter Kit

- **Quality and Reliability** – Trusted performance from a global leader in automotive components.
- **Easy Fitment:** Kit part numbers correspond directly with vehicle applications for fast, accurate installation.
- **Time and Cost Efficiency:** A single kit covers essential service components, reducing downtime and complexity.
- **Trusted Reliability:** Designed and tested by DENSO — one of the world's leading automotive component manufacturers.

Keep your vehicle performing like new with DENSO Service Kits

— where genuine quality, convenience, and reliability come together.

Section 3

Filtration

Denso Air Filters

Basic Function & Filtering Mechanism

Air Filter works to remove impurities contained in the air such as dust and foreign particles to supply clean air to the engine.

Without air filter, polluted air may enter the automobile's engine when power is generated through the repeated cycle of intake, compression, combustion and exhaust. This will lead to insufficient combustion and power, and also shorten engine life, due to damages by foreign particles.

Filtration Mechanism

Dust and other foreign particles are absorbed to filter media surface and inside.

Denso

Cabin Air Filters (CAF)

Basic Function & Filtering Mechanism

Just like the air conditioner in your house, the air conditioner in your car has a special filter. Car air conditioner filters cleanse the air both from outside and from within.

Denso

Diesel Fuel Filters (DFF)

Basic Function

Diesel Fuel Filter, or commonly known as DFF, filters dust and water from diesel fuel.

Diesel engine components like pumps or injectors are becoming more precise, especially for Common Rail Systems. These components are designed and manufactured with tolerances within a few micrometers to operate accurately under extremely high pressure.

In such systems, filtering dust and water from fuel is critical. Even tiny particles can cause damage to these components. Repairing the system can be very costly due to the precision of its components.

Denso Oil Filters

Basic Function & Filtering Mechanism

The oil filter in your engine system filters the impurities in there, to keep the engine oil clean. Why is it important to keep the engine oil clean, you might ask?

The engine oil is an important component to keep your automobile moving. However, it gradually becomes tainted as metal particle and carbon contents are mixed. Such impurities occur due to the repeated cycles of intake, compression, combustion and exhaust created by the engine parts to keep the automobile moving. With such repeated movement, friction occurs. Engine oil serves as lubricant to prevent the metal-particle/ carbon contamination caused by frictions and combustion and cleans up the inside of the engine, keeping the movement smooth.

Wiper Blades

The Denso Range

Line-Up

As well as superior OE quality and advanced design, DENSO's Wiper Blade program for the aftermarket offers complete convenience and choice – here is a DENSO Wiper Blade for almost every car. What's more, the DENSO programme offers 2 essential Wiper Blade types, and a choice of easy fitting options including bayonet, hook or twin screw installation systems

DESIGN BLADES SERIES

Truly advanced, OEM specification wiping technology – developed by DENSO – that blends outstanding wiping performance with stylish, integrated design. You can also take advantage of our Retrofit Design Blade range. Covering hundreds of key applications the range enables your customers to upgrade from conventional blades to high performance Uni Wiper Blades.

Premium and Standard available

CONVENTIONAL BLADES SERIES

A popular choice for the everyday motorist, DENSO's Conventional Wiper Blades offer all-round, long-lasting performance with a selection of different blade and installation options.

GRAPHITE COATING

Graphite is a type of carbon particle that helps to reduce "frictional resistance" on window glass with water repellent coating.

- 1) High wiping performance without the chattering sound.
- 2) Doesn't spoil the water repellent coating on the glass so it can last longer time.

Product Technology

Design Blade Premium (DDP SERIES)

Combining the superior wiping performance of Denso conventional blades with the stylishness and aerodynamic advantages of flat blades, DENSO's Uni design blade is the perfect fit for various range of vehicle in the world. Their innovative engineering, superior materials and futuristic design make DENSO's Uni Design Blade the original equipment choice of some of the world's top vehicle marques. Featuring the same advanced technologies and stylish design, our aftermarket Design blade range was the first to be launched by an OEM brand – and delivers unprecedented wiper performance whenever a replacement is needed.

Replacement Signs

Inspection and Replacement

Wiper Blades are a crucial vehicle safety feature. They must be in good enough condition to clear rain, insects, dirt and snowflakes that can all collect on the windscreen. Use our guide for your reference to Wiper Blade inspection and replacement, for safer, clearer driving vision.

REPLACEMENT ADVICE

How often should a Wiper Blade be replaced?

In general, windscreen Wiper Blades should be replaced at least once per year.

Why replace?

Wiper Blades eventually deteriorate with use, producing a streaky or uneven finish on the windscreen. To ensure a clear, safe field of vision even in bad weather, it is important to ensure the Wiper Blades are regularly checked and replaced as soon as deterioration is seen.

REPLACEMENT SIGNS

These are the four main signs of Wiper Blade deterioration that are visible on the windscreen glass. These symptoms will help you determine when a Wiper Blade needs changing.

STREAKING

Symptom: Narrow streaks are left on the windshield.

Cause: Foreign matter has attached itself to the rubber blade, or edge of the blade is worn.

REMEDY

First, clean the edge of the blade. If streaks still appear, replace Wiper Blade.

UNWIPE SPOTS

Symptom: Wiper Blade leaves one or more unwiped spots.

Cause: Rubber deformation.

REMEDY

Replace Wiper Blade.

JUMPING

Symptom: Wiper Blade jumps and makes a lot of noise.

Cause: The Wiper Blade does not move smoothly across the windshield, but vibrates noisily and bounces.

REMEDY

First, clean the windshield; then check the angle. If jumping persists, replace the Wiper Blade.

UNEVEN BLADE PRESSURE

Symptom: Wiper Blade does not contact the windshield surface evenly, leaving a large unwiped surface.

Cause: Out of shape Wiper Blade arm.

REMEDY

Replace the Wiper Blade.
